THERE IS NO LINE OF

POWDERED DRUGS

So Complete, so Reliable, or at Such Reasonable Prices, as

OUR EXTRA SELECT POWDERS.

They are powdered from the choicest materials with the greatest care, labelled with the botanical, common, German and French names; also the medical properties and formulas for preparations in which the powders may be used. Are put up in sealed tin cans of one pound each, and

NEVER OBTAINABLE IN BULK.

ALLAIRE, WOODWARD & CO.

PEORIA, ILL.

DO YOU WANT TO KNOW ABOUT Kola?

WE ARE HEADQUARTERS FOR IT,

and will cheerfully furnish samples of either the fresh or dried nuts, of the Fluid Extract, of our delicious **Kola Cordial**, or of our latest product, **Kolavin**, to any pharmacist who may be sufficiently interested to write therefor.

Kola Cordial was introduced to the profession by us about a year ago, and has paid the penalty of success in that substitutes are now being marketed under the title which we originated. Like all originals, however, ours excels its imitations, and is by far the most elegant preparation of Kola in concentrated form. It is one-fourth the strength of the fluid extract; each drachm (the usual dose) representing fifteen grains of dried Kola, and may be obtained from any prominent Wholesale Druggist.

Chemical research has demonstrated that the therapeutic action of Kola depends not only upon the alkaloids caffeine and theobromine which it contains, but largely upon a glucoside peculiar to itself, called Kolanin, which is found far more abundantly in the *fresh* than in the dried nut. It is noteworthy that the marvellous reputation acquired by Kola in Africa (its habitat) is based upon experience with *fresh* nuts. Our latest product, **Kolavin**, is a delicious wine, prepared from *fresh* (undried) nuts. As each table-spoonful (the usual dose) represents thirty grains of the *fresh* Kola nut, it constitutes a more vigorous and effective tonic stimulant than any other preparation on the market.

We have just published a new monograph, entitled "Kola." This is a strictly scientific treatise, containing all procurable information on the subject of the drug, and is profusely illustrated with original photographic plates. It will well repay a careful perusal, and will be furnished gratis to any pharmacist who will send us the accompanying coupon.

—
Fourth Revised and Enlarged Edition,

—
Handsomely bound in Cloth; 8vo, 275 pages.

—
Price, \$2.00 per Copy.

Helbing's Modern Materia Medica

is the most complete and satisfactory reference book on New Remedies yet published in any language. The previous editions achieved great popularity, and received high praise from the press, teachers, and physicians and pharmacists generally. The present revised edition far excels the former; it is almost trebled in size and contents; the monographs have all been re-written in the light of latest reports and matured opinions; every new remedy up to date, and legitimately belonging in materia medica, is described — chemically, physiologically and therapeutically; the index contains over 800 references, forming an *unabridged reference book of new remedies and synonyms*.

In a word, the book is as nearly perfect as it can be made, and no physician or pharmacist can afford to be without it.

Press Comments on the Previous Edition:

American Journal of Pharmacy: "It is a comprehensive, well-arranged little volume, suitable for ready reference, and for reliable information on mostly 'new' and 'synthetical' remedies, and as such will be found very useful to the physician and pharmacist. The very complete index, containing also the synonyms of the compounds, will be appreciated by those consulting the book."

Indiana Medical Journal: "To the busy practitioner who wishes to keep up with the times, this is a very useful little work."

St. Joseph Medical Herald: "An exceedingly desirable addition is this work to the library of physician, pharmacist or druggist."

Boston Medical and Surgical Journal: "For such of the medical profession as wish to glean quickly a little knowledge of the stream of new remedies which flows so abundantly, or a few useful suggestions about some one remedy, this book is probably the best they can own."

St. Louis Medical Review: "An indispensable adjunct to the pharmacopœia and the various dispensaries. * * * We must congratulate the author upon the manner in which he has done his work. * * * We can heartily commend the book to our readers, and would advise each and every one to possess himself of a copy, as we are certain he will never regret having done so."

The Universal Medical Journal: "The large field covered by this work is exemplified by the fact that more than 600 titles are found in the admirable index which closes the volume. No one who would keep in touch with progressive pharmacology should be without this valuable, concise and complete book of reference."

This book is now in press, and will be issued September 15th,
Orders are solicited now, for prompt delivery when issued.

PRICE, TWO DOLLARS.

Materia Medica Collection

For Students of Pharmacy and Medicine.

The student can familiarize himself practically with the properties of drugs *only as he has the opportunity to examine and handle specimens himself.* The descriptions in text-books, even when aided by elaborate engravings, appeal only to the imagination, and the impression received from reading is consequently of necessity imperfect—often misleading and generally evanescent. It is not enough, even, that the student have access to cabinet collections, although these render excellent educational service. *It is only by having the specimen actually in hand, that, with the aid of lens and dissecting-needle, he can intelligently follow the descriptions of his manual.*

LENGTH OF CASE, 28 INCHES; WIDTH, 18 $\frac{3}{4}$ INCHES;
DEPTH, 14 INCHES.

MATERIAL, ANTIQUE OAK, JAPANED TIN BOXES,
WITH ROUND GLASS TOPS.

THIS MATERIA MEDICA COLLECTION

Contains specimens of all crude drugs of vegetable origin recognized in the Pharmacopœia, and many not so recognized that are in common use—in all, 288 specimens—thus furnishing an indispensable supplement to such works as the Dispensatories, Maisch's Manual, Sayre's Conspectus of Organic Materia Medica, etc., etc.

Each specimen is put up in a little box, with a label bearing simply a number—three indexes or keys (Numerical, Botanical and Vernacular) accompanying the case. The indexes, being alphabetically and numerically arranged, enable the student to find any required specimen without difficulty, while the absence of names on the labels enables him to practise himself in the identification of drugs.

Price of the Collection: \$25.00 Net, F. O. B. Detroit.

"EAGLE BRAND"

WHITE CASTILE SOAP

This soap is made to order for us, by a leading soap manufacturer in Italy, from pure Olive Oil. The quality is guaranteed equal to any Castile Soap produced, or for sale in this market; by U.S. Appraiser's decision it is the purest, and we have consequently paid a higher rate of duty on our importations of this brand than is charged for any other standard brand. Wherever introduced the "Eagle Brand" Castile Soap makes permanent trade, and our sales are constantly growing in the most promising and satisfactory ratio.

Specify "Eagle Brand" Castile Soap when you order.

The soap is made in bars of about 3 pounds each, and is packed twelve bars in a case; it is not sold by weight, but by the bar or case.

Price, 35 cents per bar; or \$3.75 per case.

ORDERS SOLICITED.

LEHN & FINK, Proprietors & Sole Importers, NEW YORK.

Superior to Pepsin of the Hog.

52 Maiden Lane,
NEW YORK.

**Notice—Delegates to the Pharmaceutical Meeting,
DENVER, COL.**

THE PROMISED LAND

Why the Tourist, Traveler and Student should visit Utah

ONLY \$20.00 ROUND TRIP FROM DENVER

There are two reasons, either one of which ought to be conclusive with every American citizen:

FIRST.—The trip from Denver to Utah via Rio Grande Western, "Great Salt Lake Route," is the grandest to be found anywhere on the continent. No European trip of equal length can compare with it in variety and grandeur of scenery and wealth of novel interest.

SECOND.—You should go, because, when you have made this wonderful trip, you will find Utah at the end of it—Utah, one of the world's famous spots and a land of gold, silver, copper, iron and coal; of lofty mountains and fertile valleys; of vineyards, fruits and flowers. Salt Lake City, the capital, is of great interest on account of its historical and religious associations. Here are Hot Thermal Springs, Warm Springs, Sulphur Springs, Sanatorium, Parks, Drives, Canyons and the most healthful climate on earth. Great Salt Lake, with the new and beautiful Saltair Beach Resort, of Moorish design, has no equal in America. Tickets on sale at Denver, August 15th and 16th, good until August 28th. Write to F. A. WADLEIGH, SALT LAKE CITY, for copies of pamphlets, etc.

Diphtheria Antitoxic Serum.

Made at N. Y. Pasteur Institute, Dr. Paul Gibier, Director.

GIBIER'S ANTITOXIC SERUM was the first produced and supplied in America; it was available in November, 1894, and has been supplied continuously in ever-increasing quantities ever since. Literature with clinical reports sent free on request. We quote:

GIBIER'S ANTITOXIC SERUM, LIQUID.

Of highest obtainable immunizing power: **1:100,000**

In 7 ccm. vialseach \$1.25
In 25 ccm. vialseach 3.00
(To Druggists: \$1.00 and \$2.50 each.)

GIBIER'S ANTITOXIN, IN DRY FORM.

Put up, 1 gramme powder, in 10 ccm. vials; filled water, this solution represents 15 ccm. serum of 1: 100,000 power, or equal to 1,500 units Behring's serum.

Price per vial\$1.80
(To Druggists: \$1.50.)

We also supply the other products of the N. Y. Biological and Vaccinal Institute (the supply department of the Pasteur Institute), such as Vaccine Virus, Mallein, Tuberculin, Erysipelas Toxin, other cultures and toxins, and Animal Extracts. Correspondence solicited by

LEHN & FINK, Sole Agents,

128 William Street,

...NEW YORK.

SPERMINE-KRIEGER.

Spermine-Krieger is a sterilized solution for hypodermic use, put up in hermetically sealed flasks, containing 15 minims, equal to one dose.

Harmful effects are absolutely impossible, as it contains no toxic elements, and its action is based upon physiological principles.

SOURCE:—Prepared from the various glands taken from healthy young animals, and represents the tonic and stimulant agent in cell-formation or tissue metabolism.

DOSE:—Hypodermically applied, 3 to 6 minims for children, 5 to 10 minims for adults; the initial dose is gradually increased by 1 minim per day until 15 minims for adults is reached. Syringe and place of injection must be made strictly aseptic with lysol or phenol solution.

INDICATIONS:—ANEMIA, ASTHMA, CATARRH, PULMONARY AFFECTIONS, DYSPEPSIA, CHRONIC GA-TRITIS, NEURALGIA, NEURASTHENIA, NERVOUS DEBILITY, LOCOMOTOR ATAXIA, MALARIA, TYPHOID, SYPHILIS, etc., etc.

SUPPLIED BY DRUGGISTS EVERYWHERE.

LITERATURE MAILED ON REQUEST.

SPERMINE IS SOLD IN BOXES OF 12 FLASKS.

PRICE, \$3.00 PER BOX.

LEHN & FINK, Sole Agents,

128 William Street,

...NEW YORK.

Although Pepsin in its various forms will, beyond all question, digest proteids, and is therefore to be relied upon in its particular sphere,

Pepsin is of no Value

IN THE DIGESTION OF STARCHY FOODS.

TAKA-DIASTASE

The Diastatic Ferment Par-Excellence
. for the Relief of

Amylaceous Dyspepsia (Amyolytic Power, 1 to 1500)

Is capable, under conditions specified by Junck's malt test, of converting fully 1500 times its weight of dry starch into sugar, in three hours. Or, under the same conditions, Taka-Diastase will in ten minutes (and this rapid test should invariably be employed) convert 100 times its weight of dry starch into sugar.

SUPERIOR TO MALT EXTRACT.

1. **TAKA-DIASTASE** will convert 100 times its weight of dry starch. The best malt extract will not convert more than five times its weight under same conditions.
2. **TAKA-DIASTASE** is absolutely permanent. All malt extracts deteriorate with age.
3. **TAKA-DIASTASE** is in powdered form, dose from 1 to 5 grains. Malt extracts contain a preponderance of foreign inert matters, necessitating large doses.
4. **TAKA-DIASTASE** is free from sugar. Malt extracts are heavily loaded with sugar and apt to exaggerate already present pathological conditions.
5. **TAKA-DIASTASE** is perfectly soluble, and is compatible with other medicaments in neutral or slightly alkaline media. Malt extracts, owing to their viscosity, are difficult to handle and to incorporate with other ingredients in prescriptions.
6. **TAKA-DIASTASE** is economical, owing to its small dosage. Necessarily large dosage renders malt extracts expensive in comparison.

Correspondence upon this subject respectfully solicited.
